Reconsideration of this application and pending claims in view of the amendments and discussion below is respectfully requested.

IN THE CLAIMS

Please-cancel claims 19, 25 and 33.

Please enter the amended claims 1, 6, 7, 18, 20, 21, 26 and 27 below, the amendments of which are provided in Appendix I.

- 1. (Amended) A method for conferring resistance to endotoxic shock, comprising administering to an animal a composition having a physiologically effective amount of at least one OB-R agonist ligand.
 - 6. (Amended) The method of claim 1 wherein the endotoxic shock occurs in sepsis.

 7. (Amended) The method of claim 1 wherein the endotoxic shock occurs in systemic inflammatory response syndrome.
 - 18. (Twice Amended) A method for the treatment of a patient having obesity comprising the steps of:

administering at least one compound capable of inducing OB-R expression selected from the group consisting of LPS, IL-1α, IL-1β, TNF-α and IL-6; and administering a physiologically effective amount of an OB-R agonist ligand.

- 20. (Amended) The method of claim 18 wherein the compound and the OB-R agonist ligand are administered at different times.
- 21. (Amended) The method of claim 18 wherein the compound is administered in an amount from about 0.003 to about 20 micrograms per kilogram body weight.
- 26. (Amended) The method of claim 18 wherein IL-6 is administered in an amount from about 0.5 to about 20 micrograms per kilogram body weight.
- 27. (Twice Amended) A method for inducing OB receptor expression in an animal, comprising
